Five5High APP User Manual

Welcome to Five5High app, the best place to discover and buy a wide range of high-quality bags. Our app aims to provide an easy and enjoyable shopping experience, allowing users to browse, select, and buy bags from the convenience of their mobile devices.

Key features include an easy-to-use interface, advanced search and filtering, detailed product descriptions, secure payment options, and order tracking.

The manual was designed specifically for women who want a convenient and reliable way to shop for bags online, meeting to their specific style preferences and necessities.

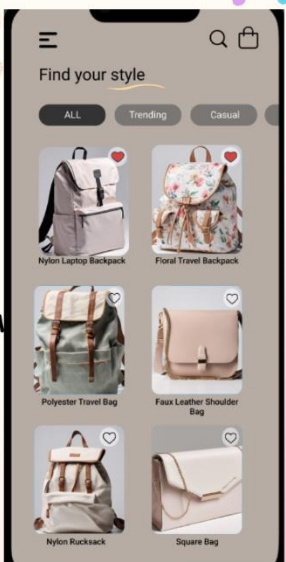

1

At first, we will see the main page of the app, where users need to sign in to continue with their shopping.

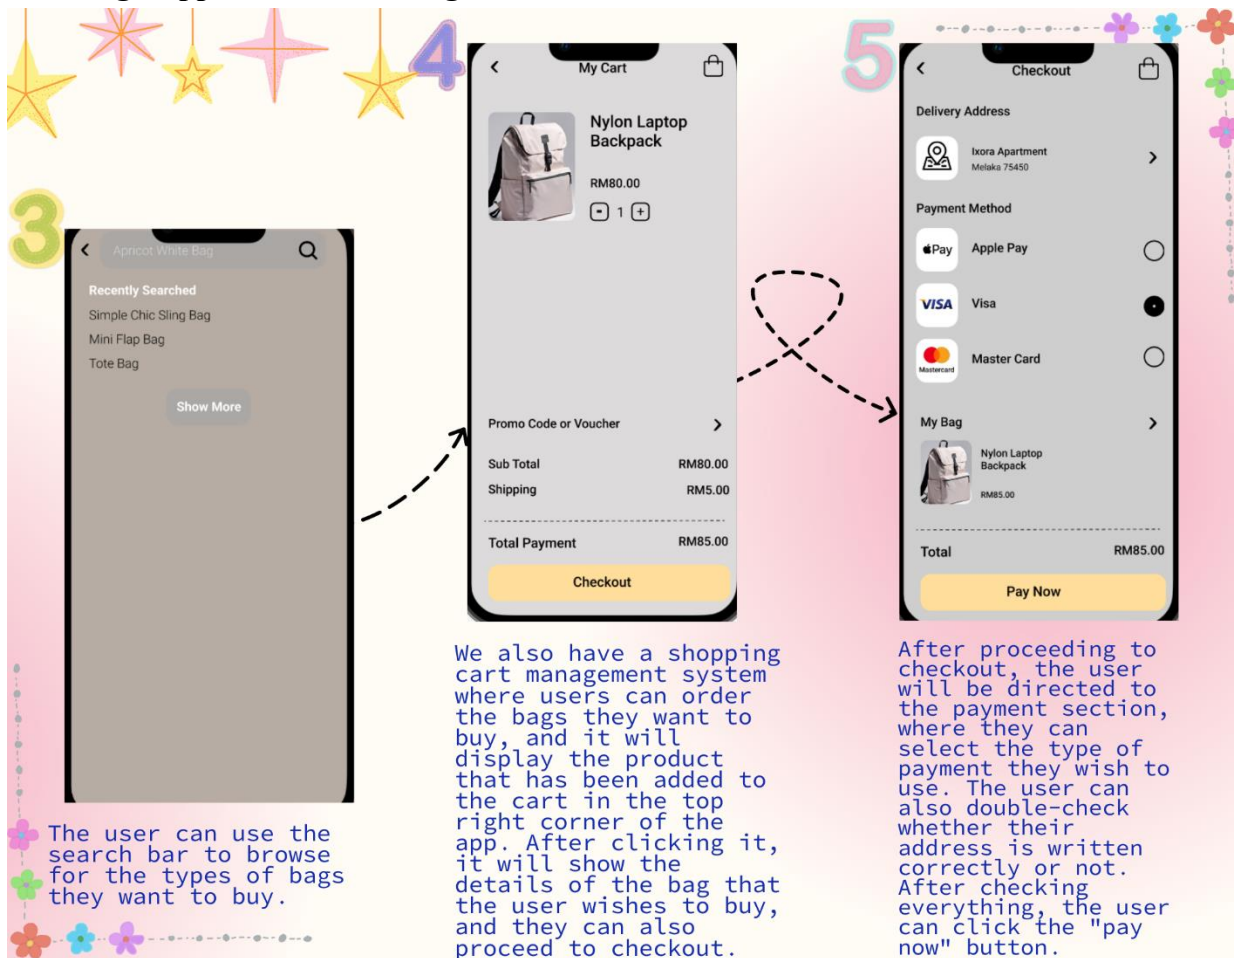

2

After signing in, our app will direct the user to the home page, where all of our products will appear for them to shop.

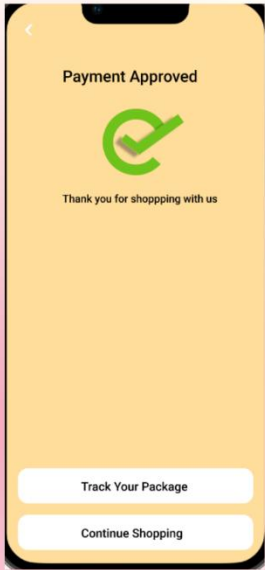

Five5High App User Manual Page 2

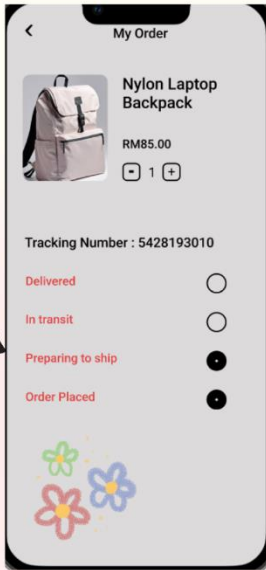

Five5High App User Manual page 3

6

Following that, the system will confirm that the payment has been approved. The user can either check the status of the package or continue shopping.

7

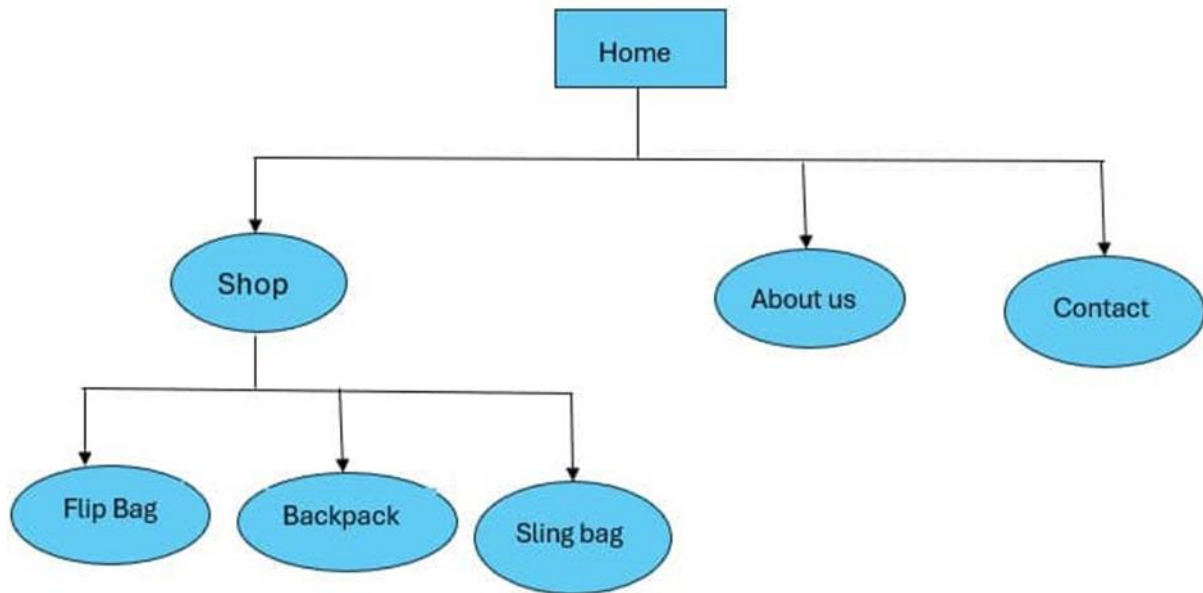

When the user clicks the tracking package button, it will show the tracking status of the order that the user has made. If the user clicks on the "Continue Shopping" button, it will redirect the user back to the app's home page, as shown in the second step of the manual.

Thank you for using our app! The color pink, which represents sweetness and is universally popular among women, strengthens our design. Our logo represents the collaboration and hard work of us five people who came together to create this brand.

Git Log

First, create a directory, Next, change the directory and initialize it.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~  
$ mkdir LDCW_Project  
  
Soothi@LAPTOP-14RIPSP3 MINGW64 ~  
$ cd LDCW_Project  
  
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project  
$ git init  
Initialized empty Git repository in C:/Users/Soothi/LDCW_Project/.git/
```

After that, we need to add the file that is inside the directory we created.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)  
$ git add "Five5High App User Manual.pdf"  
  
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)  
$ git add "LDCW6123 Project_Soothi Kee Jothi A_P Rajendram (1231302716).docx"
```

After adding it, we need to commit it with a descriptive message.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)  
$ git commit -m "Initial commit"  
[master (root-commit) 69b12ac] Initial commit

create mode 100644 LDCW6123 Project_Soothi Kee Jothi A_P Rajendram (1231302716).docx
```

We need to make sure we have a GitHub account. If we have an account, we can simply link it to GitHub by entering our username. Another step is to link it to our email address.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)  
$ git config --global user.name SoothiKee  
  
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)  
$ git config --global user.email soothisoothi@gmail.com
```

After linking it, we'll return to GitHub and create a new repository. After creating it, we'll need to copy the link below.

Quick setup — if you've done this kind of thing before

 Set up in Desktop or **HTTPS** SSH

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# LDCW-Project" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/SoothiKee/LDCW-Project.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/SoothiKee/LDCW-Project.git
git branch -M main
git push -u origin main
```

Then we go back to git bash and paste the URL link that we copied.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)
$ git remote add origin https://github.com/SoothiKee/LDCW-Project.git
```

Next, we push to the master branch. After pushing it, we will see the files in the GitHub repository that we created.

```
Soothi@LAPTOP-14RIPSP3 MINGW64 ~/LDCW_Project (master)
$ git push origin master
